

=====

SUDHIR KUMAR MISHRA | SENIOR AUTOMATION & DATA SYSTEMS CONSULTANT

=====

📍 Raipur, Chhattisgarh, India | 💻 Workstation: HP EliteBook (16GB RAM)

🔗 GitHub Vault: <https://github.com/sudhir-react>

PROFESSIONAL SUMMARY:

Analytical and performance-driven Senior Software & Systems Automation Consultant with an extensive career footprint in building high-concurrency asynchronous backend architectures and resilient data integration pipelines. Expert in optimizing algorithmic complexity down to constant $O(1)$ metrics and engineering sub-millisecond data schema validation interceptors.

=====

CORE TECHNICAL COMPETENCIES (THE WAR MATRIX)

=====

- Core Backend Engines : Python, Java, Node.js (JavaScript ES6+), C++
- Advanced Automation : Playwright Headless Chromium, Puppeteer, Scrapy
- Data Layer Operations : SQLite3, PostgreSQL, Write-Ahead Logging (WAL)
- Security Frameworks : HMAC SHA256 Cryptographic Verification
- Methodology Controls : Agile Scrum, Git Version Control, Project Boards

=====

PRODUCTION PROVEN BENCHMARKS & VERIFIED REPOSITORIES

=====

1. SWASTHYA-MITRA AUTOMATION GRID CORE

- Engineered a high-velocity Fast API Data Validation Interceptor.
- Achieved a blistering processing schema latency threshold of 0.0065 ms.
- Isolated event loops from database file locking collisions during surges.

2. TECHTELEMETRY PUBLICATION ENGINE

- Deployed a decoupled multi-lingual technology news dashboard platform.
- Designed dynamic local Storage persistence state mechanics across templates.
- Enforced zero-runtime lag language context switching via CSS selectors.

3. RESILIENT BROWSER AUTOMATION SHELL

- Programmed multi-threaded Playwright web crawlers to bypass anti-bot shields.
- Overwrote 'navigator. WebDriver' runtime telemetry properties to FALSE.
- Managed persistent session cookies and local JSON checkpoint ledgers.

=====

PROFESSIONAL EXPERIENCE & CONTRACT FOOTPRINT

=====

Independent Systems & Automation Consultant (2013 - PRESENT)

Global Client Node Operations (Upwork / GitHub Ecosystem)

- Managed active enterprise-grade distributed software repositories.
- Resolved complex backend bugs and thread starvation exceptions cleanly.
- Maintained strict sprint cycles using GitHub Agile Project Boards.

=====

EDUCATION & CREDENTIALS

=====

- Bachelor of Science / Engineering Systems Foundation
- Upwork Certified Rising Talent Software Engineer (October 2026)

=====
